Where art and craftsmanship meets
your dreams

about us

Septemar has its expertise in the field of interior decoration in mega yachts since foundation at 2008. Septemar with its experienced staff carries its know-how about mega yachts from imagination to reality.

Combining the importance of design & engineering with high quality and on time delivery production philosophy, Septemar earned many awards and satisfied customers with 30 boats in 15 years with different business partners. Besides its qualified design studio, Septemar also works with world-class designers that our customer desire to work with.

Septemar combines speed and precision advantage of mass production machines with skilled craftsmanship. With its facility that consist of design & engineering, furniture production, varnish, upholstery and installation departments in house, Septemar is capable of handling high quality boutique furniture productions as well as yacht decorations.

Septemar aims to be among the leading firms of its sector in the world by making just in time delivery of the projects without compromising the quality of its work and thereby creating unconditional customer satisfaction and loyalty.

mission

To create customer satisfaction and loyalty in the yacht furniture market by innovative approaches and therefore increase Turkey's brand value and market share

vision

- To create customer satisfaction and loyalty with high & sustainable quality and just in time delivery by our innovative and agile structure,
- To be among the leading firms in yacht furniture market with a ward winning projects,
- To create a better life for employees and the society with our social responsibility awareness and ethical values.

design & engineering

Beside its qualified design studio who won the 2012 World Yacht Trophies Best Design Award with Timeless, Septemar also works with top designers and welcomes any designer or studio that the clients wish to use for their project.

Septemar offers clients not only concept design but also detailed shop drawings and project management services.

In engineering department, design is re-constructed according to the actual measurements with 2 and 3-dimensional works. Regarding the size changes and technical requirements that may affect the design; alternative proposal drawings inline with the original design are presented to the customer after a detailed and close work with the designer.

production plant

Septemar who had founded in a 180 m² workshop in 2008 with production philosophy of high quality & on time delivery, today continues its production in 4600 m² factory that consists of design & engineering, furniture production, varnish, upholstery and installation departments in house.

Septemar builds high quality furniture that is proper to design by combining speed and precision advantage of mass production machines with skilled craftsmanship. Production which is supervised with quality control system from raw material receiving to delivery is linked to planning and material supply via Septemar MIS (Management Information System) Software.

Septemar is capable of handling high quality boutique furniture productions as well as mega yacht decorations.
